Subject: RE: Public Health Support - chemical plant fire

I haven't had any contact with a local health authority

Evelyn,

I don't know if an ACE team would be appropriate for this event? Maureen Orr is our POC. I wanted to share with OSC Adams for his situational awareness. Adam the request would go through the TDSHS to CDC and Evelyn is our POC at TDSHS in Austin.

The ACE team can survey community member and responders or others exposed for exposure and illness or injury. They can survey any receiving hospitals to assess readiness and abstract medical charts of incident associated patients. The team has access to geographers to help with mapping and the NCEH labs if biological specimens can be taken.

Okay I will alert our team to be ready to provide remote support. I will also ask my team what resources they can provide to help the response and bolster the local health authority and state.

I believe right now that remote support would probably suffice, since we haven't seen any measurements above any action levels. But I'd also respect input from your team as if they believe a site visit would be beneficial.

Adam,

Thank you for the SitRep. What are the needs/request? Do you need a team from ATSDR to come down and support Unified Command and stakeholders? Or just need us to review data? ATSDR has an ACE program that can help communities with mental health from blast. Please advise.

Below is the link you could not open. From Poison Control.

Patrick,

This email is a request for assistance. I'm attaching the Initial POLREP with incident specific information. I've spoken with TCEQ, who is coordinating with DSHS to provide assistance. I'm not able to click on your link; appreciate if you have an alternate method to contact them, if needed.

EPA data is being posted on the EPA website www.epa.response.gov/south4groupfire.

There is a link to the TCEQ website with their data.
We have portal access to TPC's data via their portal.

Thanks
Adam

OSC Adams,

ATSDR is prepared to provide public health support for Unified Command and the local health authority. We can assist in addressing risk exposure question, review environmental data, assist with messaging, and provide toxicology resources. We just need a request to support, if needed. Please open the link below. The Poison Control is advertising in social media the use of the Poison Control Center hot line.

CAPT Patrick Young
ATSDR R6
